

Condensed Unaudited Financial Statements - Nine Months and Quarter Ended September 30, 2020

The Directors are pleased to present the condensed unaudited financial statements of the Group and the Company for the Nine Months and Quarter Ended September 30, 2020.

(a) Basis of accounting

The condensed financial statements of the Group and the Company are unaudited and have been prepared using the same accounting policies as the audited financial statements for the year ended December 31, 2019, except for the adoption of new International Financial Reporting Standards issued which are now effective.

The figures for the Nine Months and Quarter Ended September 30, 2019 have been restated as a result of changes in accounting policies relating to the allocation of actuarial surplus and in the accounting of subsidiaries and associates adopted in the audited financial statements for the year ended December 31, 2019 which was not reflected in the Nine Months and Quarter Ended September 30, 2019.

(b) Operations

After two consecutive quarters of decrease, we are pleased to report that there has been an improvement during the third quarter of 2020. Gross Premium income as at 30th September 2020 is now 1% less than the same period last year.

(c) Investments

The investment portfolio grew over the third quarter as our active investment management approach supported performance. On the equity side, the stock market continued to trend lower as the economic uncertainty triggered by the coronavirus continued to weigh on investor sentiment. On the other hand, international equities recorded appreciable gains as the economic recovery of many regions proved less sluggish than feared. In addition, reports of progress in the search for a vaccine provided much hope, both for economic

activity and for the ongoing health crisis.

On the fixed income front, our investments continued to deliver encouraging returns. On markets, yields remained depressed with excess liquidity pervading the financial system.

The COVID-19 outbreak continues to pose a serious public health problem worldwide and, like other countries, the Mauritian economy has been severely impacted by weaker economic activity. With many developed countries now facing a second wave of the virus and re-entering confinement, it remains very difficult to establish the full impact of the COVID and how long it will take our economy to recover to pre-COVID level.

Our capital adequacy and solvency margin have always been above the minimums required by the Insurance Act 2005. The Group does not foresee any pressure on its solvency ratio in the near term based on the different stress tests carried out. The Group also believes that its liquidity position is adequate to ensure any future commitments and obligations that may arise. As such, the condensed financial statements as presented have been prepared on a going concern.
